Note:

The scheduling program uses random numbers to select the teams that are scheduled to play.

Your team will not be scheduled to play the same team more than twice during the year. Your team will not play the same team within four (4) weeks time (of course, due to "Position Nights", you could end up playing the same team more than twice, sooner than four (4) weeks).

The program attempts to optimize the distribution of your tee times (No team plays any tee time more than three (3) times).
